Von Bob Janes : ChronoForms 3.1 for Joomla! site Cookbook before purchasing it in order to gage whether or not it would be worth my time, and all praised ChronoForms 3.1 for Joomla! site Cookbook:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Gute Anleitung zu ChronoFormsVon Juergen CuertenAuch wenn hier die Version 3.x im Mittelpunkt steht, ist es eine sehr gut geschriebene Anleitung, die auch auf die Version 4.x bertragen werden kann.Der lockere Schreibstil gefllt mir sehr.Dazu kommt, dass es m.E. das einzige Buch zu dieser Anwendung ist.Sehr zu empfehlen

KurzbeschreibungThis book is the missing manual for creating forms on your Joomla! site. Using simple examples that you can easily follow we will show you how you can create forms of almost any kind. Most of the chapters focus

on one topic starting with simple recipes for new users and then adding new features that add more to the form but may also require more knowledge and experience to implement. Other chapters look in more detail at adding special features, or creating forms to perform particular tasks. Again the recipes range from those that a new user can easily implement to those that will help more advanced developers. Each recipe is kept as simple as possible and set out so that it can be easily implemented with the code supplied; and the recipes are also a set of building blocks that you can use to create much more complex forms using several recipes to build your form. As far as space allows we have explained how the code works, what features of Joomla or of ChronoForms we are using and we've offered suggestions in the There's more . . . sections for ways in which the basic recipe can be extended or adapted. The code examples are complete and can be adapted by new users with the minimum of customization or they can be as a starting point for developers with more coding experience to build on and adapt to create fully customized form applications. This is a practical hands-on book for people who want to add forms to their Joomla! site. Whether you just want to add a simple newsletter sign-up form or a complex multi-page interactive form you'll find helpful suggestions and recipes that will get your forms working.

ber den Autor und weitere Mitwirkende Bob Janes has been involved in IT of one form or another throughout his working career. In the last decade he's worked mainly on CMS support and development, first with E-Xoops, more recently with Joomla! and WordPress. He's been the principal support person for ChronoForms for the last three years and has made more than 12,000 posts answering user questions. Bob has an extensive knowledge of Joomla! and WordPress and he enjoys solving the problems involved in building interactive sites on these CMSs.
