Review in Journal of Terrorism and Political ViolenceVon a readerReview in Journal of Terrorism and Political Violence 18 (4), p. 603, 21 Sep 2006"Prediction is a hazardous job, particularly when it comes to the future. So goes a popular wisdom told in a jest. Yet, author Brynjar Lia navigates through this intellectual minefield with aplomb and produces a book, which is by far one of the best works on terrorism this reviewer has read in a while. My enthusiasm for this book rests heavily on the clarity of Lias arguments that makes this book so attractive."- Professor Dipak K. Gupta,

Department of Political Science, San Diego State University, USAPRAISE FOR GLOBALISATION AND THE FUTURE OF TERRORISM: The future is notoriously difficult to predict, especially when it comes to terrorism which thrives on the unexpected. Brynjar Lia's *Globalisation and the Future of Terrorism* is probably the best guide available an impressive tour d'horizon, methodologically sound, well-argued and convincing in its conclusion that, unfortunately, high levels of terrorism are going to be with us for a very long time.- Professor Alex P. Schmid, UN Terrorism Prevention Branch, Vienna
Globalisation has had a profound impact on contemporary terrorist thinking and behaviour. A pre-eminent specialist on the security environment, Brynjar Lia has authored the definitive text on the subject. As terrorist and insurgent groups worldwide harness the forces of globalization, Lia skilfully dissects its enduring impact on security. It must be read by the specialist and the generalist.- Professor Rohan Gunaratna, Institute of Defence and Strategic Studies, Singapore and US Military Academy, West Point and author of *Inside Al Qaeda, Global Network of Terror*
This book provides an extremely useful analytical toolbox as to how globalisation and broader structural causes produce and drive terrorism across the globe in differing contexts. The new global security environment demands new thinking about terrorism. This book provides that critical roadmap towards understanding terrorism strategically as an asymmetric challenge for future generations.- Dr Magnus Ranstorp, former director of Centre for the Study of Terrorism and Political Violence at the University of St Andrews, Scotland

Kurzbeschreibung This new study is devoted to understanding how international terrorism is shaped, how it evolves and what we can expect in the future. Drawing upon research and methods outside the traditional focus, and by taking both a theoretical approach and a new practical predictive perspective, it delivers a fresh and fascinating contribution to terrorism studies. While predicting terrorism is a highly speculative business, there are ways of identifying certain long-term causes, driving forces and their links with society. Terrorists are usually integral players in local and sometimes global politics. Hence, when the local, regional and international contexts change, so does terrorism. Thoroughly reviewing the body of literature on the causes of terrorism, this study also combines predictive and futuristic analyses on globalisation, supported by a range of key case studies. It spans from the transformation of international relations, the globalisation of the market economy, demographic factors, ideological shifts and technological changes. The result is a set of key conclusions about the future patterns of terrorism, which are not simply best guesses, but also backed up by solid research. This book will be of great interest to all students and scholars of terrorism, globalisation, politics and international relations.

Synopsis *Globalisation and the Future of Terrorism: Patterns and Predictions* is devoted to understanding how international terrorism is shaped, how it evolves over time and what we are to expect in the future. The book offers a fresh contribution to the terrorism literature by drawing upon research and methods outside the traditional terrorism research genre, and by taking both a theoretical approach and a practical predictive perspective that is surprisingly

unusual in the field. While predicting terrorism is a highly speculative business, there are ways of identifying certain long-term causes, driving forces and their linkages with societal conditions. Terrorists are never aliens from a distant planet, but usually integral players in local and sometimes global politics. Hence, when the local, regional and international contexts change, so does terrorism. This book offers a thorough review of the literature on the causes of terrorism and combines this research with predictive and futuristic literature on globalisation, supported by a range of case studies. The analysis spans the transformation of international relations, the globalisation of the market economy, demographic factors, ideological shifts and technological changes. The result is a set of propositions about future patterns of terrorism, which are not simply best guesses, but are backed up by research.
