An astounding life!Von mountainmamaJune Collins has written an account of her life as a show girl in Australia, Asia, and Vietnam, and her part in exposing the graft and corruption in the system that was supposed to provide much-needed diversion to soldiers. She does not sugar-coat anything, including her own sexual escapades and foolhardy adventures. Brutally honest and absolutely believable, she expertly leads the reader through her experiences and paints an accurate portrait of her life and times. The tale bounces back and forth between her younger years of poverty and

hardship in Australia and her later years in Vietnam. A fascinating and educational story of an incredible woman who survived mind-boggling situations. Although the book had numerous editing problems, the writing was heartfelt and well-crafted, deserving a full five stars. Hats off to you, Junie Moon. 0 von 0 Kunden fanden die folgende Rezension hilfreich. interesting story Von Elgin About a woman who started out just wanting to make a living while living somewhat out of "the norm" of a sixties housewife. She starts out dancing and owns a bar, and finds herself more and more disgusted by the kickbacks and bribery of those persons hired to support the troops in Vietnam, the club managers. This is still a topical story.....It is not great literature, but the story is great. Recommended read.
