Von Judicial College : Guidelines for the Assessment of General Damages in Personal Injury Cases before purchasing it in order to gauge whether or not it would be worth my time, and all praised Guidelines for the Assessment of General Damages in Personal Injury Cases:

Kundenrezensionen Hilfreichste Kundenrezensionen 1 von 1 Kunden fanden die folgende Rezension hilfreich. A clear and logical framework.... Von Phillip Taylor MBE [VIDEOID:mo4DUU9IH1OAJM] FOR THE ASSESSMENT OF DAMAGES IN PI CASES - EVERY COURT HAS ONE An appreciation by Phillip Taylor MBE and Elizabeth Taylor

of Richmond Green Chambers What are the reasonable levels of compensation for personal injury and how are they assessed? This book from the Oxford University Press, now in its twelfth edition, will, in the vast majority of cases, provide the answers in the form of guidelines. Descriptively titled 'Guidelines for the Assessment of General Damages in Personal Injury Cases', it has become over the years, the essential -- indeed absolutely fundamental -- reference for judges as well as practitioners dealing with PI cases. Writing in the Foreword, Ramsey J describes these well established guidelines "as the source of essential information for judges and practitioners when considering awards of damages in personal injury cases". He goes on to say that such guidance has become ever more necessary because the awards have become more complex as the litigation challenges increase. Not surprisingly, a copy of this volume is provided automatically to all judges involved in hearing PI cases, and as there is a copy in every court, it is obvious that if you are PI practitioner, acquiring your own copy will be fundamental to your practice. This new edition is the latest update on the established and logical framework for the assessment of damages in PI cases, taking into account such factors as inflation and the decisions of the higher courts on quantum. Under each category of personal injury, note that there is an additional precise and time-saving feature, namely a second column of figures showing the 10% uplift in general damages as recommended by Sir Rupert Jackson and endorsed by the Court of Appeal in *Simmons v. Castle* [2012]. Under the expert editorship of a working party from the Judicial College, (formerly the Judicial Studies Board) the book covers the full spectrum of personal injury from minor injuries to the most serious life changing injuries and injuries resulting in death. Included are injuries resulting in psychiatric and psychological damage.... those affecting the senses... injuries to internal organs... orthopaedic injuries... chronic pain, facial injuries, scarring, damage to hair and dermatitis. Publications from the Judicial College are relatively new (as legal reference books go) and have proved invaluable in their support of --and assistance to -- advocacy. If you as a practitioner are involved in any sort of PI case, (including infant approvals), especially where quantum is an issue, you should have a copy of this book to hand in court, bearing in mind that the judge will have already referred to it. It is indeed an understatement to refer to this book as both authoritative and indispensable.

Kurzbeschreibung The Guidelines for the Assessment of General Damages are designed to provide a clear and logical framework for the assessment of damages in personal injury cases. The first edition of this title was regarded as a landmark in personal injury practice. Each succeeding issue has built on this reputation and the book has now firmly established itself as essential reading for all those involved in the area of personal injury litigation. This twelfth new edition has been fully updated to take into account of inflation since the last edition and further altered to reflect decisions of the higher courts on quantum. It also includes an additional column of figures to show the 10% uplift in general damages recommended by Sir Rupert Jackson and endorsed by the Court of Appeal in *Simmons v. Castle* [2012] EWCA Civ 1288. As with previous editions, all judges involved in hearing personal injury cases will automatically receive a copy of the book.
