KurzbeschreibungA broad perspective on historical thought and writing, with a new epilogue.Pressestimmen'the substantive articles in the volume can stand on their own as valuable and readable contributions to historical understanding; [...] Although the volume was conceived before the fall of the Wall, as a showpiece for 'new orientations' still little known outside of Germany, the present introduction by the editor takes full account of the changes since 1989; it makes a strong case for continuing with the project of publication even after the GDR was no more and provides a very useful sketch of the development of historiography under the SED regime, giving particular attention to the conditions for the emergence of social history out of the fragmented fields of folkloristics, economic history and regional history.'
