This book applies to everybody who is looking to strengthen his or her spirituality. It looks at the Latin American version of Christianity which is a good reminder that there are more types of spiritualities than the American ones. It a good read, well written and it draws well on the scripture.

Kurzbeschreibung
A significant event in the development of liberation theology is the publication of "We Drink from Our Own Wells: The Spiritual Journey of a People" by Gustavo Gutierrez. Gustavo's book fulfills the promise that was implicit in his "A Theology of Liberation" which appeared in Spanish in 1971 and soon became a charter for many Latin American theologians and pastoral workers.

Synopsis
After twenty years, We Drink from Our Own Wells remains a classic expression of Latin American spirituality by a pioneer of liberation theology. Starting from St. Bernard of Clairvaux's counsel to root spirituality in one's own experience, Gustavo Gutierrez outlines the contours of a spirituality rooted in the experience of the poor and their struggle for life. His aim is to reflect on the contemporary "road to holiness" - the passage of a people "through the solitude and dangers of the desert, as it carves out its own way in the following of Jesus Christ. This spiritual experience is the well from which we must drink. From it we draw the promise of resurrection."
