KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. An update of a Higgins classicVon Larry EischenThis book is basically a rewrite of an earlier book by Higgins. it features

one of his early heroes Paul Chavasse, a British agent. Paul has smuggled the Dalai Lama out of Tibet and must go back to get a Russian space scientist. I found the book very similar in tone to the Quiller series by Adam Hall. Excellent 60s style espionage tale.0 von 0 Kunden fanden die folgende Rezension hilfreich. Zip up your parka, and grab your gun.Von John Mark GreenThis book is a great read! Probably one of the most enjoyable Higgins novels I've read. A spy and survival novel set in the frozen Himalayas. You don't know how in the heck he's going to get out of the country alive, but you sure hope he does. The past meets the present at the climax ending.0 von 0 Kunden fanden die folgende Rezension hilfreich. Not the best.Von Ein KundeYou can read this if you are a fan of Higgins, a speed reader, or you just have nothing else to do, but I'd recommend you do something else with your time. I did lend it to a friend, however, who loved it. The plot and setting are adequate, but nothing too exciting.

KurzbeschreibungIn 1959, British agents masterminded the escape of the Dalai Lama from Tibet. Three years later, Paul Chavasse is doing it all over againA vitally important scientist, holding intelligence that could shift the balance of world power, is being held in China.British secret agent Paul Chavasse, responsible for extracting the Dalai Lama from under Chinese noses, is the perfect man to slip through the border, locate the scientist and bring him back to the West.But Chavasse's nerve, stamina and loyalties will all be tested as he finds the Chinese are reluctant to let their asset go without a fightFrom Publishers WeeklyOriginally published under a pseudonym in 1963, Higgins's thriller focuses on the cold war-era space race. Copyright 1996 Reed Business Information, Inc.From BooklistHiggins' twenty-fourth book involves the cold war and the space race in 1962. Paul Chavasse is an agent with the Bureau, a section of the British Secret Intelligence Service. He is sent to Chinese-controlled Tibet to find and smuggle out a scientist, Karl Hoffner, living there under house arrest. Hoffner, a brilliant mathematician, has come up with a new concept of space travel infinitely superior to Russia's. Chavasse is, of course, eventually able to outrun, outshoot, and outwit his evil pursuers and save the day for the free world. Like his other novels, this one is loaded with action and adventure; it is Higgins at his best. George Cohen
