Von Jampo Ahonen : ZONES, Killer Government (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised ZONES, Killer Government (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Great actionVon 7of42A cool book, about a hero killing Zombies. I read it in two days. Mr. Arhonen, please write more of this stuff.

Kurzbeschreibung Killer Government (The Zones series book 1) by Jampo Ahonen. Book number 1 in the series of ZONES Killer Government, is the first published book of Jampo Ahonen that he has written in English. The book is entirely the work of the young author, even down the design of the cover. Recently published, this first edition was written in 2011 when only 13-year old. Jampo Ahonen is a highly talented 15 years old young man. He has written 10 books so far and is writing with passion his 11th book in English. Jampo wrote his first book, the series of PIRATES (7 in total), at the early age of 10 years old. Published in Finnish, the PIRATES series are being translated into English and will be published soon. His first five books he wrote in Finnish, and next two in English, because English had become for him the most natural language in which to express himself. Jampo has now decided to write a book in German as well this year 2013. Once the book is finished, he will have written books in three different languages, despite of his young age. Jampo Ahonen demonstrates a talent for language skills. He has knowledge of 9 different languages. Despite Finnish being his national language, he is fluent in English and German. He has a working knowledge of French and Spanish. He also understands and communicates in Portuguese and Italian on the internet with his friends around the world. He also knows some Latin, and currently the biggest interest to him is learning Japanese more thoroughly. In addition to the passion of languages and writing, Jampo likes sports, gaming, cars, guns, travelling the world, science, nature, history and the future. He has been living in France, Spain and Finland, and been visiting numerous other countries. Jampo's dream is to move to US, get his education there and live in the US in the future. To make his dreams come true, he has decided to save money for his future prospects, and most of his books income goes into funds provided by the Family Business of publishing. The ZONES series the first book The Killer Government tells about a young man adventuring and surviving in the post-apocalyptic world on US soil. The world has suffered catastrophic consequences after a doomsday-like disease has suddenly spread, turning all affected people into Zombie-like humans, hunting down any survivors. Very few people have survived in the biggest cities, all humanity has been destroyed, the Zombies are prevalent all around the World, but for some reason, some of the people called Sweepers, possibly government units, are still hunting the people remaining alive. As becoming a leader, action-oriented man, young Reeds starts to act and combat. This is the most interesting storytelling, by an exceptional and linguistically talented young Author, on the threshold of a great career.
